EDUCATION

Torrens University

Bachelor of Engineering in Software

Ultimo, NSW, Australia

2023 – 2025

TAFE NSW

Associate's in Digital & Interactive Game Design

St. Leonards, NSW, Australia

2016

EXPERIENCE

Fullstack Engineer

Soluciones en Comunicación y Electricidad (SCE)

July 2024 – Present

Querétaro, QRO, México

- Developed fullstack .NET applications to interact with security installations.
- Provided technical system support to the engineering team.
- Developed internal tooling for company productivity, utilising AI workflows.

Game Developer

Intr Studio

July 2023 – July 2024

Bunbury, WA, Australia

- Developed games targeting both PC and VR/AR systems.
- Implemented pathfinding, audio, UI, and input systems.

Lead Developer

Leaderboard Games

February 2022 – July 2023

Québec City, QC, Canada

- Developed games targeting both PC and iOS/Android.
- Led development of a small team, organising the production across all projects.
- Led the technical design and workflow for the team across all projects.
- Implemented combat, AI, UI, inputs, pathfinding, graphics, loot, and crafting systems.

Software Developer

Self Employed - Freelance

July 2019 – Present

Remote

- Developed applications, tools, and games targeting PC, iOS/Android, Web, and VR/AR.
- Developed plugins, mods, and implementing configurations as specified by clients for Minecraft servers.
- Bid for, and successfully won contracts in a global market.
- Led interaction with clients for each project, working closely with each client to implement their designed solution.
- Tutored various clients in programming, software development, and video game development.

Software Developer

Red Cartel

August 2018 – July 2019

Crows Nest, NSW, Australia

- Developed applications, tools, and games targeting PC, iOS/Android, Web, and VR/AR.
- Maintained a variety of existing projects for clients, making changes as requested via feedback.
- Prototyped demonstration projects for clients to help facilitate the company winning contracts.
- Developed on pioneering spacial VR game technology.

PROJECTS

SCE Visión | C#, Blazor, JavaScript, HTML/CSS, PostgreSQL, Docker

May 2025 – Present

- Developed a fullstack web application using Blazor for a home security team.
- Implemented OAuth to handle authentication for staff.
- Implemented the conversion of streamed footage into WebRTC.
- Implemented front end UI requirements based on feedback.

Sovereign Of The Seas | C#, Unity, Git

July 2023 – July 2024

- Developed a game targeting PC and VR/AR.
- Implemented spatial audio using a FMOD plugin for Unity.
- Implemented A* pathfinding, utilised by NPCs and UI.
- Implemented a tutorial system to handle the onboarding of new players.

Battle Forge Hero | *C#, Unity, HLSL/GLSL, Git*

August 2022 – November 2022

- Led development for a game targeting iOS and Android.
- Implemented all game features across a variety of systems such as combat, loot, and crafting.
- Collaborated with artists and the designer to implement other members' contributions.

Steal The Crown | *Java, SQL, Paper, Spigot, Maven, Git*

April 2021 – July 2021

- Developed a Paper Minecraft server plugin for a server I was contracted to.
- Implemented an SQL database to track a leaderboard of all players.
- Collaborated with players to implement new features and fix bugs.

Dream Channel | *C#, Unity, HTML/CSS, JavaScript, Git*

August 2018 – April 2019

- Maintained and implemented new features for a Web3 music artist promotion platform.
- Developed cross-platform builds for PC, WebGL, iOS, and Android.
- Integrated Web3 technologies from an external team into the project.
- Led interactions with the client on behalf of the company, gaining feedback to implement.
- Collaborated with and led interns in developing features.

TECHNICAL SKILLS

Languages: C#, Java, HTML/CSS, JavaScript/Typescript, SQL (MySQL, PostgreSQL, SQLite), HLSL/GLSL, Python, Lua, R, Bash/Zsh/PowerShell, Rust, PHP, Go, C/C++, Groovy, Kotlin

Frameworks: Unity, Unreal, Bevy, ASP.NET, Blazor, MAUI, Angular, React, Vue, Svelte, Astro, Node.js, Forge, NeoForge, Fabric, Bukkit, Spigot, Paper, Velocity, Waterfall

Developer Tools: Git (GitHub, GitLab, BitBucket), GitHub Actions, Docker, AWS, Azure, Firebase, Google Cloud Platform, Supabase, Netlify, Vercel, Heroku, Maven, Gradle, Postman, Rider, IntelliJ, WebStorm, PyCharm, RustRover, Visual Studio, VS Code, Jira, Asana, Kanban (Trello, GitHub Projects), Notion, Teams, Slack

Libraries: xUnit, NUnit, JUnit, Entity Framework, Newtonsoft.Json, OpenGL, DirectX, FMOD, MQTT, WebRTC, OAuth, Three.js, Babylon.js, Chart.js, Pandas, NumPy, SciPy, Matplotlib
